

**TESTIMONIAL FROM CHARLES BARKY, 1904**  
 "Gentlemen.—In reply to your letter, requested by me, May 16th, 1904, from your Patent Machine Machinery, I have much pleasure in stating from an experience of more than two years, in its application to the production of the most coverings of the flower of Ferns, and other applications, that I have no objection to your publishing the above statement, to make the most favorable report concerning it, and add that it has more than justified the favorable terms on which I recommended it in 1881 to Her Majesty's Commissioners of the Exhibition, and which I have since adopted.—I remain, Gentlemen, very truly,  
 "CHARLES BARKY."  
 "Messrs. Taylor, Williams, and Jordan."
